

DEMO MOTOR POLICY | POLICY DIC-PC-0091273 | SYNTHETIC TRAINING DOCUMENT

This fictional policy is authored for the Claims Lifecycle Agent demonstration. It describes synthetic motor cover and is not a real insurance contract.

SECTION 4.1 | Comprehensive accidental damage: direct physical loss caused by a sudden accidental event, including collision and flood water ingress, is covered while the policy is active and subject to exclusions, deductible and limit.

SECTION 4.2 | Engine Protector add-on: internal engine damage caused by water entering the engine during a covered flood event is covered when Engine Protector is active on the policy. Evidence of the incident and a garage estimate are required.

SECTION 7.1 | Compulsory deductible: subtract INR 1,000 from the otherwise eligible claim amount before determining the payable amount.

SECTION 7.2 | Depreciation: apply the synthetic demonstration depreciation rate to the garage estimate before applying the coverage limit. Actual policy conditions would govern a real claim.

SECTION 8.1 | Per-incident limit: maximum coverage payable under this fictional policy is INR 500,000 per incident.

Coverage cannot be inferred from historical similarity. If the relevant clause, add-on status, incident evidence or amount is unclear, route the claim to a human reviewer.
